

Stahl* Recovered Fold Rollers

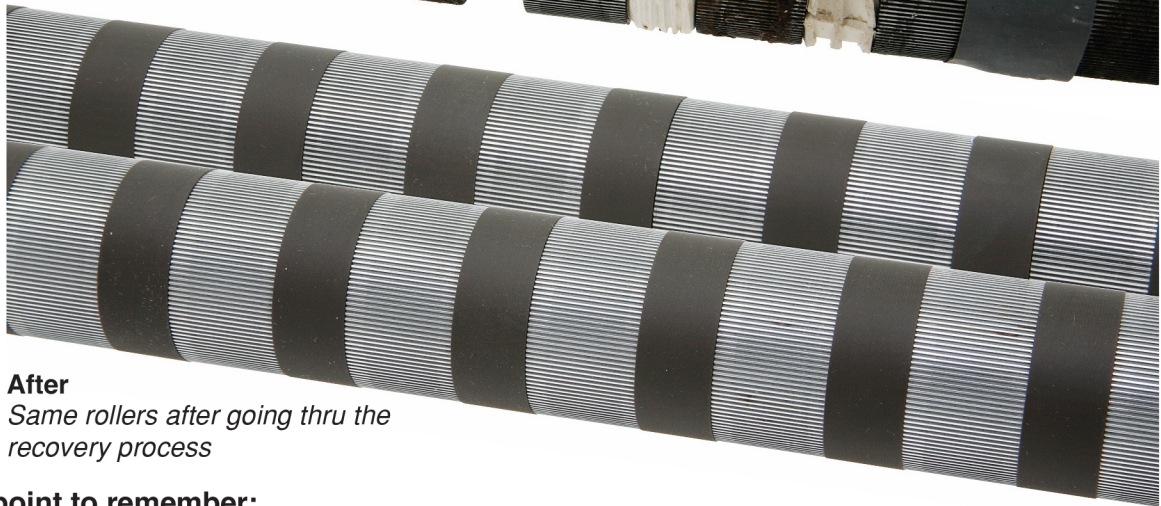

Recovered Fold Rollers are economical way to return life to your folder.

You should consider to recover your fold rollers if:

- The steel is not excessively worn.
- You can be without your folder for the period of recovery.
- If price is a consideration.

Before

Actual before & after photos of the same rollers.

After

Same rollers after going thru the recovery process

The Recovery Process:

- Roller is received and inspected to see if the roller is a candidate for recovery to see if there is excessive steel wear or journal wear. If we determine that the roller is not a candidate for recovery you will be contacted to discuss your options before we proceed.
- Old material is stripped off.
- Core is straightened.
- Your choice of new urethane material is applied (standard poly urethane or Soft P.U. foam).
- Urethane is ground to OEM specs.
- Final inspection

A point to remember:

The best job of fold roll recovery will not duplicate the quality of a new set of fold rollers due to the previous wear in the steel of the recovered rollers.
